YIN NYEIN AYE

SENIOR WEB DEVELOPER

Expertise

Design and Planning

- Project Flow Diagram
- Database Normalization
- Wireframe
- Mockup

Front-End Technologies

- HTML
- CSS
- Bootstrap
- Tailwind CSS
- JavaScript
- VueJS
- ReactJS
- Redux Toolkit

Back-End Technologies

- PHP
- Laravel Framework
- Livewire Approach
- Controller Approach
- Zend Framework

Database Technologies

- MySQL
- MS Access
- Firebase
- Microsoft SQL Server
- SQLite
- PostgreSql
- Redis

Other Technologies and Concepts

- RESTful API
- Testing
- PHP Scripting
- Bash Scripting
- RabbitMQ
- Job Queue Management

Profile

Dedicated and detail-oriented web developer with over 5 years of experience in the financial sector, skilled in building secure and scalable web applications for private entities.Committed to aligning with organizational goals and contributing to successful project outcomes.

Work Experience

May 2024 – Present

MYSOL Co.,Ltd

Senior Web Developer

- Investigate New Modules
- Maintain And Enhance Legacy Projects
- Automate Tasks With Bash Scripting
- AWS Multithreading
- Social Media API Integrations
- Analytics, Reporting, and Dashboards
- Real-time Messaging And Notifications
- Continuous Learning Of Web Development Trends

Jan 2022 – April 2024

ITVision Hub Co.,Ltd

Senior Web Developer

- Supporting Junior Developers
- Code Review For Quality And Best Practices
- Optimized Web Applications
- Created And Maintained RESTful APIs
- Integrated Third-Party Services And Libraries
- Database Design Optimization
- Implemented CI/CD Pipeline
- Experience with DigitalOcean for Server Deployment and Configuration

May 2019 – Dec 2021

ITVision Hub Co.,Ltd

Junior Web Developer

- Structured Database Design And Normalization
- Created Wireframe And Built Mockups
- Responsive Design Implementation
- Interactive Elements Development
- Cross-Browser Compatibility Testing
- Proficiency In Git For Collaboration
- Team Collaboration

Development Tools and Platforms

- Git
- GitHub
- GitLab
- Digital Ocean
- AWS
- Apache
- Nginx
- Docker
- CI/CD

Methodologies

- Agile Manifesto
- SDLC

Project Summary

Cuepid (Influencer Marketing Platform)

Overview

Cuepid is an influencer marketing platform that enables companies to promote their products by creating campaigns, collaborating with influencers, managing rewards and payments, and tracking campaign performance through secure APIs and real-time analytics. Access to the platform is restricted, and users must register before using any features.

Key Features

- User registration and login via email and social accounts
- Role-Based Access Control (RBAC) with 2FA and secure authentication
- Campaign creation, influencer invitation, and content approval workflow
- Social media API integrations (Facebook, TikTok, Instagram)
- Reward configuration, payment tracking, and service fee management
- Real-time messaging and notification system
- Analytics, reporting, and visual dashboards
- Admin management, moderation, and dispute handling

Frontend Technologies : AngularJS, Typescript
Backend Technologies : PHP (Laravel Framework)
Database : MYSQL
Deployment : AWS
Link : https://enterprise.cuepid.net
https://influencer.cuepid.net

Atobarai (Post Payment Service)

Overview

Atobarai is a post-payment (pay-later) service that allows customers to place orders first and complete payments at a later stage. It manages secure order processing, payment status tracking, invoicing, and settlement workflows while integrating with external systems through reliable APIs.

Key features:

- Authentication and authorization for secure system access
- Post-payment (pay-later) order processing for retail and wholesale
- Order Tracking & Approval Review
- Invoice generation
- Transaction management (payments, refunds, reclaims)
- Integration with external payment APIs
- Handling failed payments and bad debt management

Frontend Technologies : HTML, CSS, Javascript
Backend Technologies : PHP (Zend Framework)
Database : MYSQL
Deployment : AWS
Link : https://www.ato-barai.com
